

Senior officials from the Ministry of Coal visited the Coal Gasification Plant of Talcher Fertilizers Limited, a Strategic JV of RCF, CIL, GAIL and FCIL.

This ₹ 19,062 crore mega-project will annually produce 12.7 lakh tonnes of urea through coal gasification.

With 68 % work completed and over 3,500 dedicated personnel on site, the project is powering India's march towards self- reliance in urea production while driving clean energy innovation.
